Acknowledgement of Country

We acknowledge and respect Victorian Traditional Owners as the original custodians of Victoria's land, waters and mountains, their unique ability to care for Country and deep spiritual connection to it. We honour Elders past and present whose wisdom has ensured the continuation of culture and traditional practices.

We acknowledge the profound impacts of climate change on Country and recognise the power of Traditional Owner knowledge in responding to and adapting to change. We are committed to genuinely partner, and meaningfully engage, with Victoria's Traditional Owners and Aboriginal communities to support the protection of Country, the maintenance of spiritual and cultural practices and their broader aspirations in the 21st century and beyond.

Getting Started

Register your project

If you are planning on renovating, extending or refreshing your place, your lease requires you to notify the Alpine Resorts Victoria (ARV). You can do this by completing the registration form by clicking [here](#) or by emailing: property@alpineresorts.vic.gov.au

Registering your project ensures that you will receive early notification of planned road closures, traffic management, major events, utility interruptions and severe weather warnings. It also means that if there is an emergency event we will be able to provide you and your contractors with additional support and guidance to stay safe and plan appropriately.

Planning permits

The Department of Transport (DTP) is the Planning Authority. The Planning Authority is responsible for assessing planning applications, issuing planning permits and monitoring and enforcing noncompliance. You may need a planning permit if you are painting, renovating or extending your building. Permits are usually required for trimming, pruning or removing a tree or vegetation.

Contact DTP on 136 186 or by email at planning.support@transport.vic.gov.au to check whether you need a Planning Permit. If you need a Planning Permit, DTP provides free pre-application meetings to help you.

Building permits

You may need a Building Permit if you are undertaking renovation or building works. If you don't know whether a Building Permit is needed, you should contact an Independent Building Surveyor for advice.

ARV is the statutory repository for Building Permit documentation such as permits and occupancy certificates. Please remind your Building Surveyor to provide this information to the ARV, otherwise we may not be able to provide you copies when you need them.

ARV induction

ARV can provide your builder and tradespeople with an on-site induction at the start of your project. The induction covers the information in these guidelines and gives your team a chance to clarify requirements and ask questions. We can also share information specific to your site like site boundary maps and information about nearby projects. To arrange an induction, please email property@alpineresorts.vic.gov.au.

Your Contractors

Contractor management

You are responsible for the actions of your builder and tradespeople. Please make sure your builder and tradespeople receive a copy of these guidelines. General information on what to check when selecting your builder or tradesperson is [available here](#).

Reporting incidents

You must ensure that environmental incidents such as spills, leaks, sediment run-off or vegetation damage are reported to ARV immediately. We can assist you to manage these incidents and protect our environment.

ARV would also like to be advised of any notifiable incidents under Work Health Safety legislation, such as serious workplace accidents and plant roll-overs.

Onsite Works

Geotechnical

Landslides do occur in the Resort, which is why a Preliminary Geotechnical Report is required for all construction, demolition and excavation works. The Geotechnical report provides critical information on managing risks at your site. Your Planning Permit will require compliance with all report recommendations. Make sure your building and tradespeople receive a copy of the report and comply with it.

If signs of land instability are observed, cease work immediately and contact 000 if it's an emergency or ARV. Early warning signs include trees tilting, breaks in the ground, cracks or displacement of walls, roads or paths.

Dial before you dig

Dial Before You Dig (DBYD) is a FREE service providing information about underground essential services infrastructure. Call 1100 during business hours or submit your enquiry online 24/7 at www.1100.com.au.

Your DBYD report will provide information about known underground infrastructure; however care should always be taken when excavating.

Remember your neighbours

ARV resorts are year-round communities with permanent residents and regular visitors. We encourage you to let your neighbours know about your project, no matter the size. Whilst undertaking works, please keep in mind your neighbours and our resort visitors that come here to enjoy our unique environment and events.

Vehicles & traffic management

ARV permission is required for any full or part road closure. Please provide us with at least 2 weeks' notice, so that we can check with other sites to minimise impacts across the village. You will be responsible for traffic management, in accordance with your ARV approved Traffic Management Plan. ARV permission is required to use access trails or areas outside your site boundary.

Try to reduce the number of trades vehicles in the village during events, as visitor parking is limited. Construction vehicles and equipment should be parked clear of hydrants, electricity substations and rubbish huts and on hardstand areas, wherever possible to reduce environmental impacts.

Bushfire & Emergencies

Weather conditions

Weather conditions can deteriorate quickly in alpine areas - lightning, heavy rain and strong winds are common. Download the [VicEmergency App](#) and respond to severe weather alerts. We recommend you move out of Ash forest areas if winds are predicted to reach over 70km per hour.

Cold snaps can occur any time in summer resulting in snow – be prepared and make sure you have chains and diesel vehicles have antifreeze coolant and Alpine Diesel. All vehicles without a valid Village Parking Permit will be required to leave the Resort at the start of the Declared Snow Season.

Emergency Management

Check with the resort office you are working at for the Neighbourhood Safe Place or Place of Last Resort. If your project is registered, ARV will provide you with updates and safety information during fire danger periods. Information on what ARV do to enhance community safety is included in the Resort's Emergency Management Plan. Please see with the resort's operations for further information regarding this plan.

Hot works are banned on Total Fire Ban days, unless you have a CFA Permit. Fires on construction sites are banned at all times. For more information see the [CFA's Can I or Can't I webpage](#).

Waste Management

Rubbish & hard waste

ILLEGAL DUMPING WILL BE PROSECUTED, TO THE FULLEST EXTENT OF THE LAW. LANDLORD ACTION MAY ALSO BE TAKEN.

Your site must be kept tidy, clean and tidy at all times. Rubbish huts are for domestic waste only – the use of rubbish huts to dispose construction waste is strictly prohibited.

Construction and demolition waste including paint and other liquids must be disposed legally outside the resort. Paint and liquid waste must not be washed down drains or sewers. Skip bins must have lids to prevent waste being blown away.

Advice on the disposal of construction waste should be sought from the local council in the area closest to the resort where the waste will be generated or disposed of.

Water pollution

Anyone allowing material to enter a waterway or even leaving the material where it can be washed offsite constitutes a breach of the [Environment Protection Act 2017](#). On-the-spot fines and/or legal action apply to intentional or unintentional water pollution acts.

To minimise potential pollution, install and maintain erosion and sediment controls and keep your site, local roads and pathways clear of mud, debris, litter, soil and sand.

Asbestos

If your property was built before the mid-1980's it is highly likely to contain asbestos. Buildings built between the mid-1980s and 1990 are also likely to contain asbestos.

A permit to remove asbestos must be obtained from WorkSafe. Only a WorkSafe Licenced Class A or Class B Removalist can remove asbestos – you should check their licence.

Sediment & erosion

Sediment can flow into stormwater and be released into the environment, reducing the quality of natural waterways and impacting aquatic flora and fauna.

You are responsible for sediment and erosion management on your site. All sediment control measures listed in your Planning Permit or Site Environmental Management Plan (SEMP) must be implemented and maintained throughout your project. Non-compliance can be actioned by DTP as the Planning Authority and Alpine Resorts Victoria as the Landlord.

The Environment Protection Authority's best practice [guide to preventing erosion and sediment impacts is available here](#).

Protecting Our Environment

You are working in a unique alpine environment that is home to many threatened and endangered species. ARV is here to help – contact the Environment Officer of the resort, if you need advice or support.

Animals

Dogs and cats can pose a serious threat to native wildlife. Animals, including dogs and cats are prohibited in Alpine Resorts unless an ARV Permit has been issued.

Fines up to \$2,500 apply for bringing an animal into the Resort without a permit.

Native vegetation

If you have a SEMP, you need to comply with it. Make sure your Builder and tradespeople read and understand the SEMP and always have a copy available on-site.

Every effort should be made to retain or relocate native vegetation. A Planning Permit is usually required to trim, lop or remove trees.

Plant and equipment should be washed at the carwash in the nearest town to prevent weeds and pathogens being brought to the resort. Your SEMP will require this.

ARV Infrastructure

Damage & remediation

You are responsible for protecting the assets of ARV and your neighbours. If you damage someone's asset, the remedial works will be at your cost.

If you are unsure where your boundary is, ARV can provide you with a site map.

Contact ARV before undertaking works so a joint condition assessment of ARV assets can be completed. Asset condition will be photographed.

If ARV assets are damaged during the works, you are required to notify ARV immediately. This will allow us to work with you to reduce further damage and cost.

Connections

All connections to the ARV sewerage, potable water or stormwater systems must be approved by ARV prior to works commencing.

To seek permission, please complete contact the Head of Operations and Assets at the resort in which you are working.

Unauthorised connections may need to be disconnected at your cost.

Site Inspections

Compliance

If you have a Planning Permit, you must comply with it. DTP, as the Planning Authority, may visit on-site to confirm compliance or ask for information such as photos and plans.

If you have a building permit, you are required to comply with the permit and any directions from your Independent Building Surveyor. Your Building Surveyor is legally responsible for ensuring that your works comply with the Building Act and Regulations and has powers to enforce compliance.

Site inspections

During your project you may receive on-site visits from DTP as the Planning Authority, your independent Building Surveyor and ARV. Site inspections are a way of checking that your project is progressing and that you are complying with conditions and directions.

At an on-site visit, you may be asked to provide copies of your Planning Permit, Building Permit, SEMP, Traffic Management Plan etc.

Shutdown

All external works are required to cease during:

- Christmas Day and New Year's Day inclusive;
- The Easter holiday;
- Major events in the Village (if notified by ARV);
- 15 May and the end of the Declared Snow Season.

The 15 May deadline may be extended by DEECA, with Alpine Resorts Victoria consent. If you require an extension to this deadline email property@alpineresorts.vic.gov.au by the end of April.

Extensions may be granted subject to a risk assessment.

Don't leave shutdown to the last minute. Early snow can make it more difficult and time-consuming to tidy your site, clear debris and complete final tasks.

Shutdown dates are enforced.
